An introduction to new outdoor waterproof technology.

Acrylic neon sign

Replicating the appearance of PVC and silicon neon signs, acrylic neon sign is a fully new technology to solve the problem of waterproof and excessive joints in old neons. It's ideal solution for outdoor application in various weather condition, but cost-effective and creative possibilities.

Features

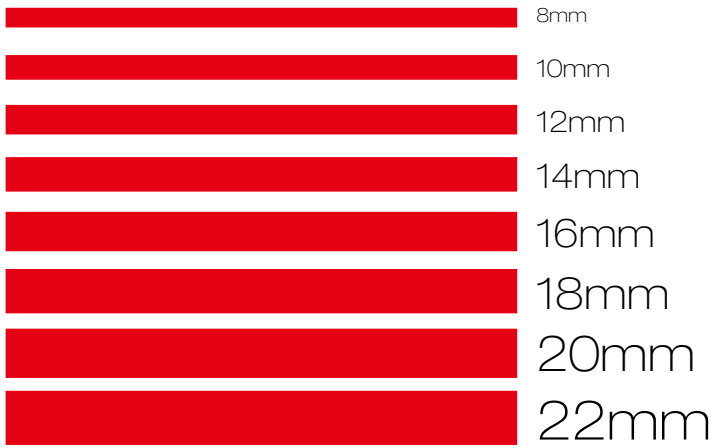

The whole acrylic neon sign is uni-body with smooth surface, without any visible joint, so there is no need to be polished and sprayed.

IP67 rating, poured with liquid acrylic in the internal of the sign, which brings its waterproof rating up to IP67 and excellent for outdoor application in various weather.

Various face colors are optional, and Pantone colors or other selected special colors can be customized.

Neon sizes optional:
8/10/12/14/16/18/20/22mm

Flexible SMD LEDs strip inside with low power consumption and long service life.

STRAIGHT

The installation is very flexible, not only can be installed with a whole acrylic backboard, for the letters, also can be mounted singly without backboard.

Technical Spec

1. Material: Acrylic
2. Sizes of neon: 8/10/12/14/16/18/20/22mm
