An introduction to new outdoor waterproof technology.

Acrylic neon sign

Replicating the appearance of PVC and silicon neon signs, acrylic neon sign is a fully new technology to solve the problem of waterproof and excessive joints in old neons. It's ideal solution for outdoor application in various weather condition, but cost-effective and creative possibilities.

Features

The whole acrylic neon sign is uni-body with smooth surface, without any visible joint, so there is no need to be polished and sprayed.

IP65 rating, waterproof LED strip plus with waterproof glue coating in the internal of the sign and drain holes in the bottom. Triple designs bring its waterproof rating up to IP65 and excellent for outdoor application in various weather.

Various face colors are optional, and Pantone colors or other selected special colors can be customized.

Neon sizes optional:
8/10/14/20/25/30mm, bigger sizes
customized

Waterproof flexible SMD LEDs strip
inside with low power consumption and
long service life.

STRAIGHT

The installation is very flexible, not only
can be installed with a whole acrylic
backboard, for the letters, also can be
mounted singly without backboard.

Waterproof Solution Comparision

Onlnic

VS.

Others

- Uni-body design, no any exposed joint that would let water in
- IP65 waterproofing led strip inside, plus with waterproof glue coating

- Tiny drain holes set on the bottoms to leak out the water immediately once water get in to ensure inner dried away

- Metal shell (optional) for blocking the rain

- Many cutting joints in PVC and silicone neon signs, so need to manual put waterproof glue on end caps and joints, but the glue will drop off after long term application
- Internal glue filling on the sign none-waterproof led strip, but cause problem of heating realse and bad for LED service life

3 Type Acrylic Neon Signs Optional

Hollow type

Completely hollow without backing board, suitable for small signs in which letters or neon lines close.

Backing type

Attached to backing board, suitable for the signs in which letters and neon lines separated widely.

Shell type

Equipped with metal shell, suitable for big signs and require higher waterproof performance to block the rain

Technical Spec

1. Material: Acrylic
2. Sizes of neon: 8/10/14/20/25/30mm
3. IP rating: IP65 waterproof
4. Power consumption of neon: 10W/m
5. Input voltage: 12Vdc
6. Lifespan: 100,000 operational hours
7. Acrylic backing board thickness: 5mm
8. Warranty: 1 year
9. Outdoor application: store, logo, event, bar and business places.
